Mr. Eldon Mathes
Plant Engineer
Keller Manufacturing Company
Corydon, Indiana 47112

Dear Mr. Mathes:

Re: Disposal of Painting Equipment
Cleanup Wastes

This will acknowledge the receipt of your request for disposal of a liquid cleanup waste and a solid, dried finish waste. The liquid waste is the result of cleaning of paint equipment with a commercial solvent. The solid material is the dried finish scraped from the painting equipment. It is understood that your company generates approximately 70 gallons of the liquid waste per week and 140 gallons of the dried finished material per day.

You are hereby notified that approval is granted for the disposal of the dried finish waste at the Harrico Landfill, Harrison County, operating permit #31-1. The dried finish material is to be mixed with the general refuse and all refuse is to be covered with six inches of soil by the end of each working day. Any necessary local approval should be obtained from the Harrison County Health Department prior to disposal.

The liquid finish waste material is not suitable for landfilling due to the high solvent content. Material which has a high solvent content should either be reclaimed or incinerated. The nearest Indiana facilities which may be able to handle the liquid cleanup waste are:

1. Industrial Liquid Waste Disposal
R. R. 3
Columbus, IN 47210
AC 812/574-5235
2. Seymour Recycling
P. O. Box 665
Seymour, IN 47274
AC 812/522-4051

Mr. Eldon Mathes

November 29, 1976

Please notify this office within 30 days of the date of this letter as to the disposal of the liquid finish waste material so we may be assured this material is properly disposed of. We also remind you that liquid industrial waste must be transported in accordance with Regulation SPC-17 (copy enclosed). If you should have specific questions on SPC-17 and its permit program, contact Mr. Jim Hunt of the Water Pollution Control Division of the Indiana State Board of Health at AC 317/633-5278.

If you have any questions, please contact Mr. Guinn Doyle or Mr. Johnnie Baker of the Solid Waste Management Section at AC 317/633-6400.

Very truly yours,

Roland P. Dove, Director
Division of Sanitary Engineering
